Hiring Manager
LG Electronics North America
Englewood Cliffs, NJ, 07632

Dear LG Electronics North America Hiring Manager,

I am writing to express my strong interest in the Public Relations Intern (PR/Marketing) position at LG Electronics North America. I am currently pursuing a Bachelor of Science in Technology Systems Management at Stony Brook University. As a student with both Korean and U.S. cultural experience, I am especially excited by LG's global brand presence and its ability to connect with diverse consumers across markets. With hands-on experience in marketing analysis, visual content creation, and event coordination, I am confident I would bring value to your PR and Marketing teams.

During my internship at dChoi Global, I created content for the U.S. market for a Korean brand using Canva and Figma. I focused on informative content to improve audience engagement and managed a global ambassador program with nine influencers. By analyzing campaign performance through Google Analytics, Shopify, and social media metrics, I refined content strategies based on audience insights. As a result, Instagram profile visits increased by 185% month over month. This experience strengthened my analytical, communication, and design skills, aligning with your need for idea visualization and data analysis.

In my current role with Digital Healthcare Partners, I use AI tools such as Claude, Gemini, and ChatGPT to streamline proposal development and research reporting, which reduces drafting turnaround time by 50% while improving consistency. This experience has strengthened my ability to recap daily results and organize information efficiently. Additionally, as a Global Ambassador for Incheon Metropolitan City, I conduct comparative research on public campaigns, which has deepened my understanding of branding and multicultural communication. These experiences have prepared me to support LG's research initiatives, PR campaigns, and cross-functional meetings with professionals with energy.

I am particularly inspired by LG Electronics North America's commitment to enhancing everyday life through meaningful experiences. The opportunity to contribute to a company that blends technology, design, and global consumer insight would be incredibly exciting. I would welcome the opportunity to further discuss how my background and enthusiasm can contribute to your team. Thank you for your time and consideration.

Sincerely,
Aeri Choi
